

ORDRAN

ARCHITECTURAL POOL SYSTEMS

INFINITY

INFINITY + OVERFLOW ARCHITECTURAL POOL

A project pathway for vanishing-edge and overflow water architecture, with shell, overflow collection, balance volume and hydraulics treated as one coordinated system.

POOL BODY

8.0 x 4.0 x 1.6 m

Current stated body size

SHELL

FRP

Reinforcing ribs

SURFACE

Anti-UV gel coat

Current technical pack

EDGE

Infinity / overflow

Project hydraulic design

Illustrative imagery. Final configuration follows approved project documents.

INFINITY project geometry + construction

FRP shell with reinforcing ribs and overflow-edge construction for the current documented infinity configuration.

POOL BODY

8.0 x 4.0 x 1.6 m

Current stated body size

SHELL

FRP

Reinforcing ribs

SURFACE

Anti-UV gel coat

Current technical pack

EDGE

Infinity / overflow

Project hydraulic design

PROJECT CONTROL

The overflow edge, collection, balance volume, pump duty and controls must be resolved for the actual project before release.

Configure the system around the actual project.

CONSTRUCTION

Construction family

FRP shell with reinforcing ribs and overflow-edge construction for the current documented infinity configuration.

PROJECT CONTROL

Geometry + interfaces

The overflow edge, collection, balance volume, pump duty and controls must be resolved for the actual project before release.

OPTIONS

Water + feature pathways

Filtration, heating/cooling, salt / UV / ozone / automatic-pH pathways, covers, counter-current and selected architectural options are frozen against the final project schedule.

SUPPLY-ONLY

Local project responsibilities

Foundations, retaining, drainage, lifting, installation, electrical / plumbing connections, barriers, approvals and commissioning remain local responsibilities unless expressly included.

OPEN RELEASE ITEM

Drawing reconciliation remains open: the stated 8.0 x 4.0 x 1.6 m body and the larger overall dimensions shown on the current technical drawing must be reconciled before final release.

Brief. Configure. Resolve. Release.

Use the ORDRAN Project Brief to freeze the pool around the architecture, water experience, destination and local-project interfaces.

01

BRIEF

Dimensions, intended use, project type, edge / window intent and destination.

02

CONFIGURE

Geometry, construction family, equipment, finish and option pathways.

03

RESOLVE

Approved drawings, hydraulics, logistics, local interfaces and release evidence.

04

RELEASE

Production, QA, packing and project documentation against the approved configuration.

ORDRAN SUPPLY

Configured product package and supporting documentation for the supplied scope. Project review is remote from client / local-team-supplied drawings, photos, dimensions, access information and destination details.

LOCAL PROJECT TEAM

Foundations, lifting, installation, utilities, barriers, local engineering, approvals and commissioning unless expressly included in the written quotation.
