PILE / YARN

60 mm / 14,000 dtex

STITCH DENSITY

8,820 stitches/m²

BACKING

Composite PP + Leno; latex

EVIDENCE

2020 FIFA Quality and Quality Pro laboratory pass; final field certification separate.

COMPLETE FIELD PACKAGE

Turf, matched stabilising and performance infill, seam materials and shockpad where specified. Base construction, drainage, line marking and testing must be reviewed as one project-specific system.

The supplier advises an eight-year grass warranty; written conditions must be verified. Alternative EPDM/TPE infills require their own evidence for the proposed construction.

Project specification pathway

Send a clear project brief for technical selection and quotation

- Project country and location
- Field dimensions and playing level
- Annual or weekly usage intensity
- New build or replacement
- Base, drainage and condition
- Infill and shockpad direction
- Consultant / tender / FIFA requirements
- Installation, testing and handover roles
- Target timing and delivery port

SUPPLY-ONLY

LUTHVAR supplies turf systems on a wholesale and project basis. Installation, civil works, testing and local regulatory compliance are project responsibilities.
