

Soft-Connection-I

PRODUCT INTRODUCTION ↓

It is specially designed of small unit soft connection block structure, the unique tile system enhances the adaptability to the ground, reducing the effect of thermal expansion and contraction, maintain court stability, and can be played all year round!

PRODUCT STRUCTURE ↓

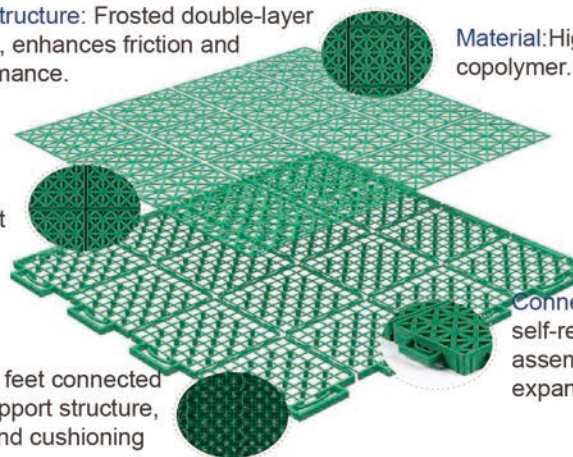

Surface layer structure: Frosted double-layer asterisk design, enhances friction and anti-slip performance.

Material: High performance polypropylene P.P. copolymer.

Tile structure: TReinforced double-layer support design, stable impact resistance; provides excellent foot feeling and shock absorption.

Bottom structure: Multiple feet connected by ribs form an elastic support structure, providing good stability and cushioning effect.

Connection method: Innovative elastic self-retracting buckle connection, solid assembly, effectively alleviates thermal expansion and contraction.

PRODUCT FEATURES ↓

- ITF Approved
- ♻️ Modified P.P. raw material, 100% recyclable.
- 💡 Patented Soft connection suspension system, strong adaptability to the ground.
- 🧱 Double layer structure ensure structural stability and provide much more energy returns, shock absorption .
- ⬇️ Vertical and lateral shock absorption for player safety.
- 🎨 UV resistant raw materials, excellent court color fastness and long lifespan.

Model No.	Y/FLEX-16	✓
Material	PP	✓
Dimensions	40cmx40cmx1.58cm	✓
Shock Absorption	≥25%	✓
Ball Rebound	≥90%	✓
Service Life	10 years+	✓
Application	Basketball,tennis,volleyball,badminton etc	✓

COLOR OPTIONS ↓

Red	Green	Dark Green
Sea Blue	Orange	Yellow
Light Blue	Medium Grey
