

AUREMONT

MODULAR POOL SYSTEMS

Four standard sizes. One controlled modular system.

A premium planning and selection guide with scaled model diagrams, installation relationships and project-control information.

COMPACT

4 x 2 x 1.4 m

COMPACT PLUS

4.3 x 2.25 x 1.4 m

MID-SIZE

5.1 x 2.24 x 1.5 m

LONG FORMAT

9.1 x 2.2 x 2 m

MODEL ARCHITECTURE

Four fixed external formats - drawn to relative scale.

The plan diagrams below use the actual length-to-width proportions of each standard model. Depth is shown separately. Use final project CAD for construction and interfaces.

01 · COMPACT

4 x 2 x 1.4 m

Small-footprint / plunge-style

DEPTH

1.4 m

02 · COMPACT PLUS

4.3 x 2.25 x 1.4 m

Compact residential

DEPTH

1.4 m

03 · MID-SIZE

5.1 x 2.24 x 1.5 m

Residential + hospitality

DEPTH

1.5 m

04 · LONG FORMAT

9.1 x 2.2 x 2 m

Long swimming layout

DEPTH

2 m

DIAGRAM STANDARD

All model drawings are vector linework inside the PDF, so dimension lines and labels remain sharp when zoomed or printed. Relative plan proportions reflect the published standard external length and width.

CONCEPTUAL DIAGRAM - NOT FOR CONSTRUCTION

COMPACT FORMATS

COMPACT + COMPACT PLUS

Two standard modular footprints for tighter sites. Photography is representative; dimensional diagrams carry the standard external geometry.

AUREMONT COMPACT

4 x 2 x 1.4 m

BEST FOR

Urban homes, courtyards, villa suites, holiday stays, glamping and compact wellness projects.

CONCEPTUAL DIAGRAM - NOT FOR CONSTRUCTION

AUREMONT COMPACT PLUS

4.3 x 2.25 x 1.4 m

BEST FOR

Homes, villas, holiday accommodation and selected boutique hospitality projects.

CONCEPTUAL DIAGRAM - NOT FOR CONSTRUCTION

LARGER FORMATS

MID-SIZE + LONG FORMAT

A balanced general-use pool and the longest current Auremont format. Both remain fixed standard external sizes.

AUREMONT MID-SIZE

5.1 x 2.24 x 1.5 m

Residential + hospitality

Lifestyle homes, holiday properties, villas, boutique hotels and resort applications.

CONCEPTUAL DIAGRAM - NOT FOR CONSTRUCTION

AUREMONT LONG FORMAT

9.1 x 2.2 x 2 m

Long swimming layout

Exercise-led homes, premium villas, resorts, hospitality and long narrow sites.

CONCEPTUAL DIAGRAM - NOT FOR CONSTRUCTION

Installed AUREMONT Pathways

AUREMONT pools remain container-based modular systems whether freestanding, deck-integrated or partially recessed.

**MODULAR
CONTAINER FORM**
Engineered for strength
and global delivery.

**PREMIUM
POOL INTERIOR**
High-performance finish
and integrated access.

**INTEGRATED
PLANT ZONE**
Compact and efficient
equipment layout.

**STANDARDISED
GEOMETRY**
Four optimised models
to suit a range of projects.

All dimensions shown are standard external dimensions.

AUREMONT is a supply-only modular container pool system.

AUREMONT™

MODULAR POOL SYSTEMS

INSTALLATION PATHWAYS

Container Pool Systems — Typical Installation Concepts

1 ABOVE GROUND

ON PREPARED BASE

2 DECK INTEGRATED

WITH SURROUNDING DECK STRUCTURE

3 PARTIALLY RECESSED

INTO LANDSCAPE / GROUND

4 FULLY RECESSED / ENGINEERED IN-GROUND

WITH STRUCTURAL SUPPORT & DRAINAGE

MODULAR | DURABLE | ARCHITECTURAL | GLOBAL

Final support, services, drainage and local compliance requirements vary by project. AUREMONT is supply-only. Installation is by the client's local project team.

AUREMONT SYSTEM ANATOMY

Container Pool Systems — Core Elements and Compatible Options

COMPATIBLE OPTIONS

Compatible options vary by standard model.

VIEWING WINDOW

Toughened glass viewing window with structural frame (optional).

HEATING

Heat pump or alternative heating systems (optional).

POOL COVER

Automatic or manual pool cover systems (optional).

LIGHTING

Integrated LED lighting for ambiance and safety (optional).

STEPS / BENCH

Integrated steps or bench configurations (variant options).

ENHANCED TREATMENT

UV, ozone or advanced water treatment systems (optional).

COUNTER-CURRENT SWIMMING

Integrated counter-current system for resistance swimming (optional).

Compatible Features & Configuration Pathways

Available features and configuration pathways depend on the selected model and project package.

VIEWING WINDOW

Transparent panel pathway

Panel geometry, support and sealing are project-controlled.

COVER SYSTEMS

Manual / powered / sliding-deck pathways

Travel clearance, structure, power and local safety requirements control.

BAJA SHELF

Shallow ledge / lounging zone

Internal layout must be frozen before final CAD.

POOL + SPA

Separated water-zone concept

Hydraulics and temperature control are resolved as one system.

TREATMENT

UV / salt / automatic backwash / controls

Exact equipment belongs in the final schedule.

COUNTER-CURRENT

Exercise / continuous-swim pathway

Electrical and hydraulic demand are confirmed before manufacture.

PROJECT PATHWAY

Model selection comes before site lock-in.

A strong modular-pool project resolves size, option compatibility, access and local works before foundation, landscaping and delivery arrangements become expensive to change.

The project documents control.

The range guide helps select the standard model. The final quotation, approved project CAD, configured equipment schedule and release documentation govern the pool that is actually supplied.

01	RANGE GUIDE	Choose the standard model.
02	QUOTATION	Commercial scope, options, exclusions and delivery pathway.
03	APPROVED CAD	Configured geometry, equipment zones and interfaces.
04	RELEASE PACK	Freight, lifting, equipment references, manuals and handover information.

SUPPLY-ONLY SCOPE

Local project works remain local unless expressly included.

- | | | | |
|-------------------------|-------------------|-----------------------|-------------------------|
| • Foundations / support | • Crane + lifting | • Installation | • Electrical + plumbing |
| • Drainage / backwash | • Pool barriers | • Permits / approvals | • Commissioning |
