

THE OUTDOOR COLLECTION

OUTDOOR SYSTEMS

A considered range of manual steel louvre systems and selected aluminium pergolas for outdoor living, entertaining and project supply.

Two materials. A clear choice.

Start with the setting and the way it will be used. Each product is reviewed against the site, dimensions, roof operation and standard factory finish before a supply quotation is finalised.

Steel Collection

MANUAL LOUVRES

A practical range of pergolas, carport, outdoor kitchen shelter and garden storage formats for suitable inland residential sites.

Aluminium Collection

OPERATION BY CONFIGURATION

Four selected aluminium configurations for freestanding and wall-attached outdoor environments.

Manual louvres, designed for living.

Two manual-louvre pergola configurations for suitable inland residential projects. The exact roof-zone layout, posts and fixings are specified before order acceptance.

Single-Zone Steel Pergola

MANUAL ADJUSTABLE ROOF

A straightforward louvre-roof option for backyard dining, shade and relaxed outdoor seating.

Dual-Zone Steel Pergola

TWO MANUAL ROOF ZONES

A different arrangement for larger outdoor settings. Confirm the roof division and supports for the selected size.

More than a pergola.

Distinct steel formats with manual adjustable roofs. Accessories and items visible in the photography are illustrative unless listed in a written quotation.

Steel Louvre Carport

SINGLE-VEHICLE SETTING

Adjustable roof, not a sealed solid roof. Vehicle clearance must be checked.

Outdoor Kitchen Shelter

COOKING & ENTERTAINING

BBQ, cabinetry, screens, ventilation and other equipment are separately specified.

Pergola with Storage

SHADE + STORAGE

Confirm storage enclosure, doors and flooring in the final kit schedule.

A more architectural expression.

Selected aluminium structures combine clean profiles, adjustable roof options and integrated drainage. Operation, supports and dimensions are confirmed for the chosen configuration.

VERSATILE ALUMINIUM PERGOLA

Freestanding

An adaptable double-layer aluminium louvre roof for outdoor dining, relaxing and entertaining.

Manual or motorised operation is determined by the selected variant. Factory-standard finishes only.

Motorised roof choices.

Select a supported aluminium model based on roof operation, structural arrangement, desired size and project location. We do not substitute photographs from another system.

MOTORISED ALUMINIUM PERGOLA

Freestanding

An adjustable motorised aluminium louvre roof, available in selected standard sizes. Product-specific imagery is withheld until the exact visual match is confirmed.

Architectural Aluminium Pergola

LARGER PROFILE / MOTORISED

Actual dimensions and structure by quotation.

Wall-attached outdoor living.

A building-attached system for an appropriate supporting structure. Two front posts and rear building connection must be considered as part of the overall project.

WALL-ATTACHED ALUMINIUM

A refined *roofline.*

The current ORZENZA wall-attached offering is motorised. Final roof operation and attachment engineering require written confirmation.

Find your outdoor system.

Browse by use and roof operation; confirm final sizes and product availability with Apollo. These names are the ORZENZA customer-facing collection descriptions.

SYSTEM	FORMAT	ROOF
Single-Zone Steel Pergola	Freestanding	Manual
Dual-Zone Steel Pergola	Freestanding	Manual
Steel Louvre Carport	Carport	Manual
Outdoor Kitchen Shelter	Kitchen / shade	Manual
Pergola with Storage	Shade / storage	Manual
Versatile Aluminium Pergola	Freestanding	Manual or motorised
Motorised Aluminium Pergola	Freestanding	Motorised
Wall-Attached Aluminium Pergola	Attached + 2 posts	Motorised*
Architectural Aluminium Pergola	Freestanding	Motorised

* Wall-attached roof operation and specific engineering remain subject to final written supplier confirmation.

Protection starts beneath the finish.

BUILT STRONG. PROTECTED FOR THE OUTDOORS.

Durability begins with the materials beneath the surface. ORZENZA steel outdoor systems feature an advanced zinc-aluminium-magnesium alloy coating, providing an additional layer of protection against corrosion. This protective technology helps defend the underlying steel through everyday outdoor exposure, supporting long-term durability and confidence in your outdoor investment.

THREE ELEMENTS. ONE PROTECTIVE SYSTEM.

Protective surface film

Can develop with exposure

Zinc + aluminium + magnesium

Metallic protection layer

Structural steel

Underlying material

Zn

Zinc

Sacrificial corrosion protection

Al

Aluminium

Adds protective barrier properties

Mg

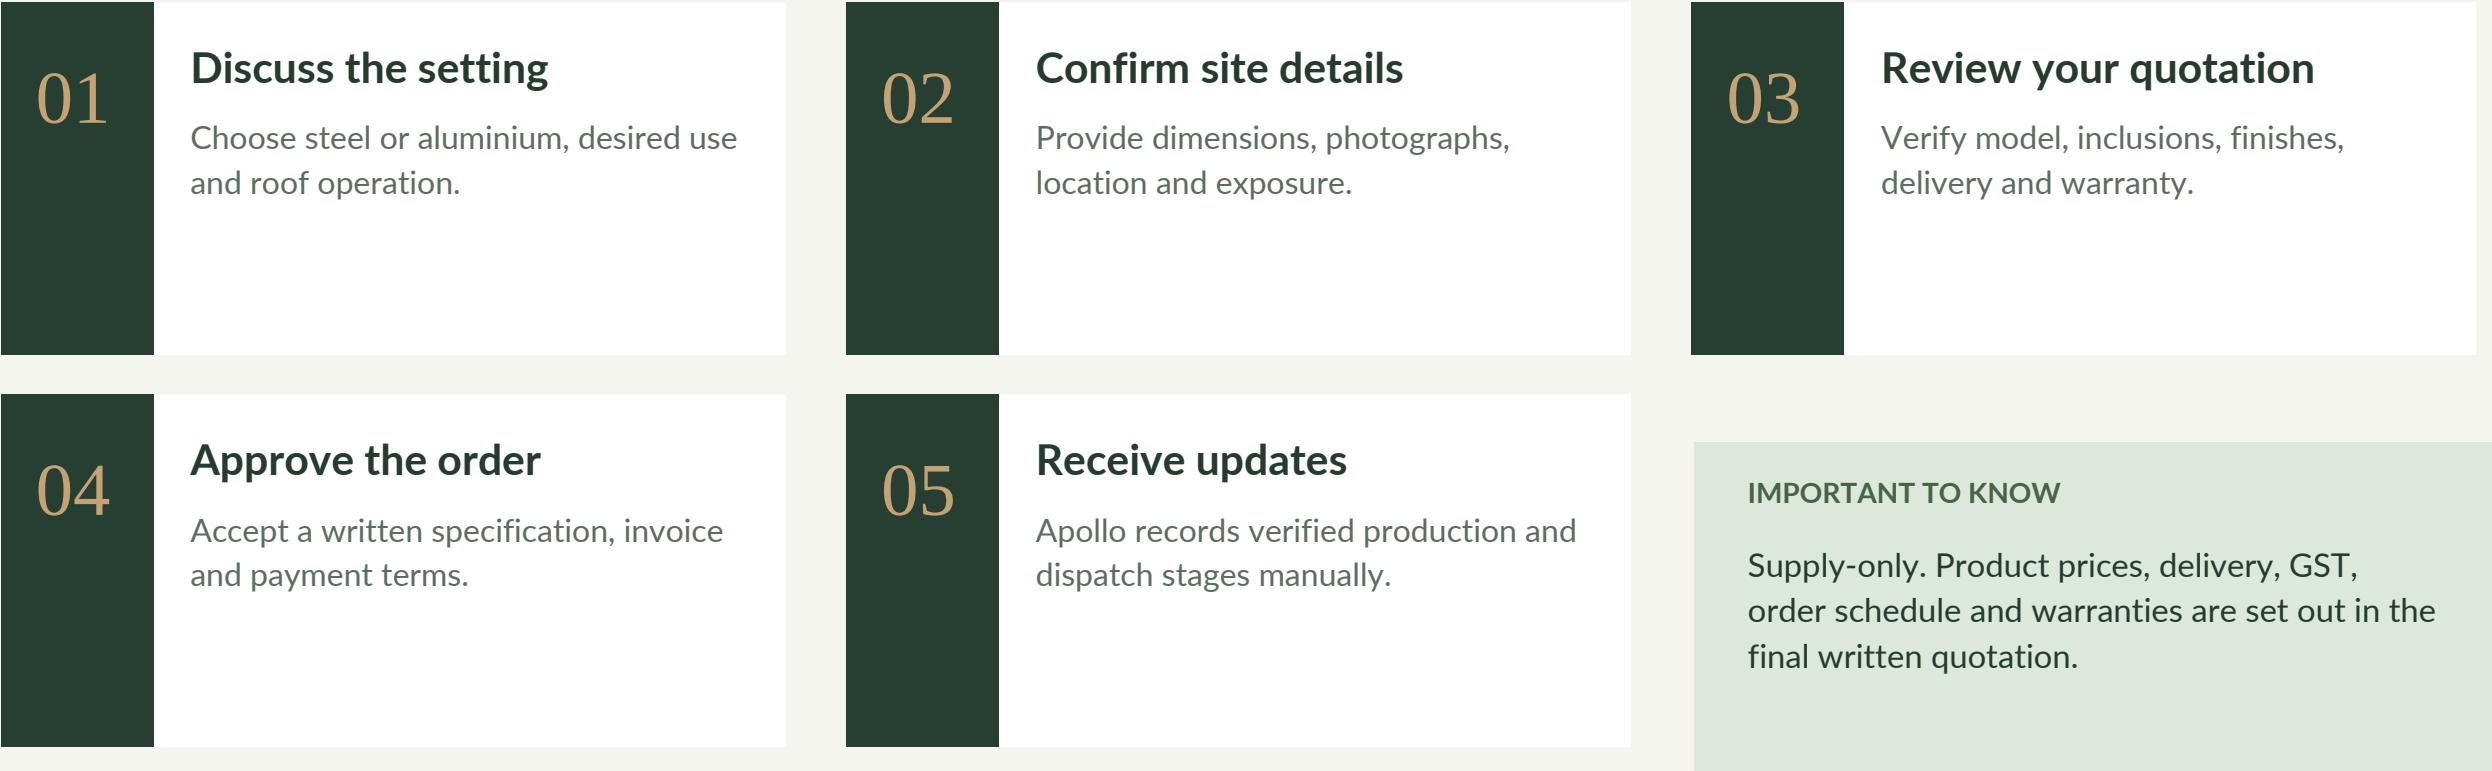

Magnesium

Helps develop a protective surface layer

Suitability and care: Performance depends on the specified coating, site exposure, correct installation and maintenance. ORZENZA steel systems are currently intended for suitable inland residential settings.

A clear route to wholesale supply.

Apollo supplies the product. The local project team is responsible for site checks, installation, foundation preparation and any required approvals. We confirm each order and production milestone in writing.
