

wood textured

PRODUCT INTRODUCTION ↓

100% super PVC transparent wear layer
High density, good foot feels.
Excellent wear resistance, slip resistance
Outstanding shock absorption, energy return, ball bounce and ball speed

PRODUCT STRUCTURE ↓

Maple wood pattern PVC transparent layer is excellent surface, which improves wear resistance, lasting maple pattern, professional anti-slip.

Maple pattern printing layer: excellent pattern, stable color

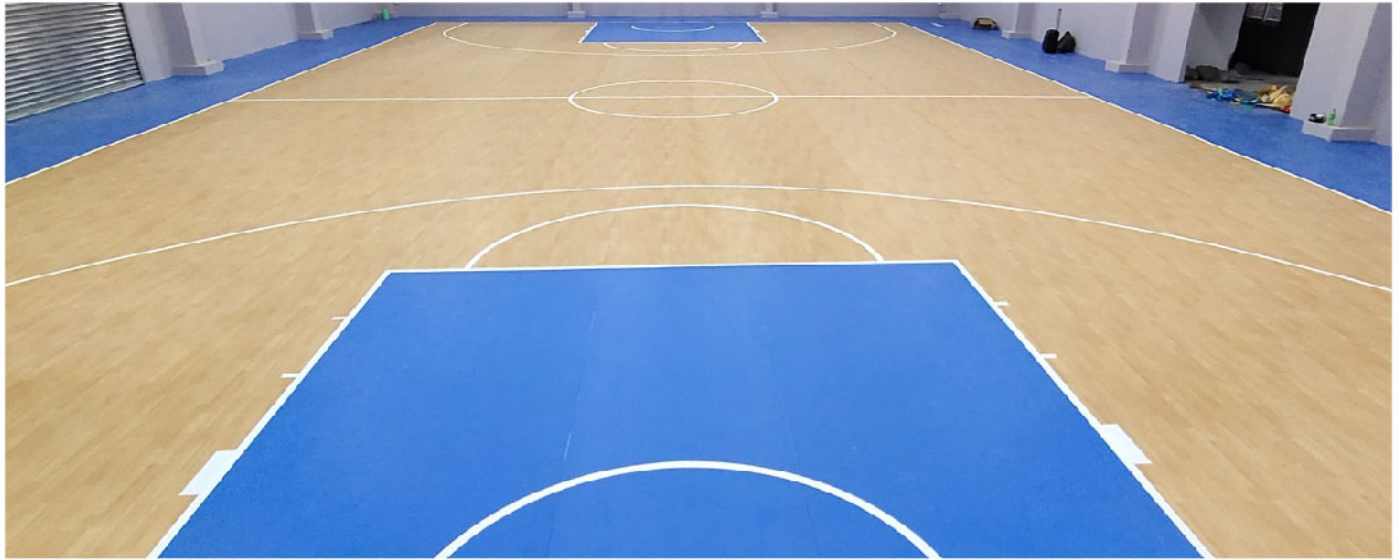

PVC reinforced stabilization layer blended with fiberglass mesh to prevent the floor from deformation

Sealed foaming layer provides good rigid support, creates a good condition for shock absorption and energy return.

The high-density elastic foam layer ensures excellent shock absorption, providing professional sports protection

Bottom layer: Enlio special "Y" shape design anti-movement layer, which forms a strong grip and adsorption force to prevent the floor from moving.

PRODUCT FEATURES ↓

- 1 FIBA Approved
- 2 The inner layer with high-density of fiberglass mesh and to ensure long term use.
- 3 Bottom layer with special design, prevents the floor from moving.
- 4 PVC transparent layer is easy to clean and more wear resistant.

Model No.	Y-65170, Y-65710X	✓
Specification	14m(length)*1.8m(width) *7.0mm(thickness)	✓
Reinforced Layer	Fiberglass mesh	✓
Bottom Layer	Enlio "Y" Bottom Grains	✓
Level	battle	✓
Application	domestic and international high-end basketball venues, gymnasiums, multipurpose sport centers	✓
Warranty	15 years	✓
